

Inserting plagiarism check report into FQT file

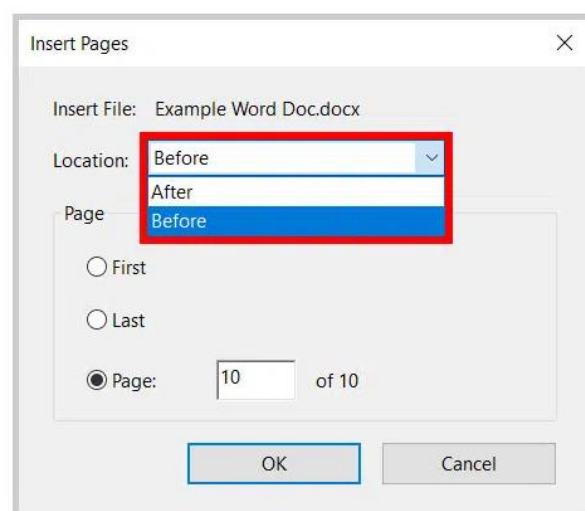

Plagiarism check report in *.pdf format should be inserted into FQT file of the same format. Files are merged using licensed Adobe Acrobat Standard program or any other software/online services with page insertion functionality (e.g. PDF Binder, PDF Hammer, Perfect PDF Reader, <https://docupub.com/pdfmerge/>, <https://smallpdf.com/merge-pdf>, http://www.ilovepdf.com/merge_pdf and others which are freely available online and provide step-by-step instructions).

If you use Adobe Acrobat Standard, open the FQT file, select the **Page Thumbnails** icon, then **Options** button, and select **Insert Pages** from the drop-down menu (Pic. 17).

As shown in picture 18, a new document can be inserted at any location of the current file (in our case, it should be inserted after the last page).
