

Thesis works and abstracts in the Research Library of Tomsk State University

The Research Library of TSU organises a stock of thesis works (doctoral and candidate) by getting copies of pre-approved thesis works and abstracts from the Dissertation Council of TSU. There are more than 7 thousand copies of thesis works, defended in TSU since 1935 until now, and items donated to the library from authors from other universities. Currently there are more than 100 thousand copies of abstracts on various disciplines.

Thesis works and abstracts are located in the department of the library stock (book depository) of the Research Library. Thesis works are borrowed only in the Professors Reading Room upon request. Some abstracts (available in two copies) are borrowed for a period of 1 month.

Thesis works and abstracts may be copied in compliance with the photocopying rules of the Research Library (http://www.lib.tsu.ru/win/dokument/uslugi/Kopirovanie_izdanii.pdf).

Since 2010, candidate and doctoral thesis works and abstracts are digitised and provided as full texts in the E-library of TSU: (<http://www.lib.tsu.ru/>).

Thesis works and abstracts on all disciplines from the library stock of the Russian State Library (since 1998) are available in the licensed subscription databases “Digital Dissertation Library of the Russian State Library”. You can access full texts in the database only from the TSU RL network with an individual password, which can be obtained from the consultants of the Research Reading Room.
